SUNPIECES PRESS RELEASE - SPRING / SUMMER 2013

Artisan manufacturer of luxury Eyepieces, Gold & Wood, illustrates the revival of the brand with three new solar models.

ATIK, ATRIA and AVIOR

LUXEMBOURG - Gold & Wood, the global standard for luxury eyepieces, unveiled today three new solar frames: ATIK, ATRIA, and AVIOR.

Gold & Wood chose to present these three Sunpieces from among 14 new Eyepieces at MIDO 2013 in Milan and New York. The Sunpieces embody the delicate revival of the brand by connecting its customers with the magic of the world around us.

Connecting timelessness with modernity, the three models strike the perfect balance between the latest trends and classic style. This delicate balance between trendy and classic also reveals Gold & Wood's refined style, highlighting the beautiful combination of materials made possible only through Gold & Wood's exclusive manufacturing process.

With their aviator-inspired face and their adjustable exotic wooden temples, handmade by artisan craftsman, these models reveal the magical connection offered by Gold & Wood Eyepieces.

Gold & Wood Sunpieces, including Atik, Atria and Avior, are equipped with category three polarized lenses, offering the best protection for your eyes against glare and the sun's harmful rays.

They are available in three combinations of wood and precious metals: Brilliant Gold, Dark Ruthenium and Palladium associated with Carob at Brown Wenge, and Ebony.
